SASS & CSS

ABOUT ME

Ambitious, devoted and motivated are traits that define my working ethic and modus operandi. I will always reach for a great work environment as my social soft skills combined with my commitment, make business and inter-personal relationships natural. I am an innate team worker.

I present myself as an ESMAD alumni and software developer with experience on web development and API integration.

PROFISSIONAL EXPERIENCE

- College Lecturer at **ESMAD - IPP**
September 2023 - Present
Delivering lectures on programming with a primary focus on JavaScript language and associated technologies. Responsible for imparting relevant knowledge to students, conveying fundamental programming concepts and practices and exploring practical applications through project development.
- Software Developer at **MOG Technologies**
June 2022 - Present
In October 2022 I joined the team responsible for developing the company's website and OTT-TV platform.

In the company's website project, I was responsible for developing and integrating an API that served to supply data to the frontend, in which I also participated in its development.

The company's OTT-TV platform was a project aimed at different devices in which I took part in implementing new features and integrating external APIs
- Full-Stack Developer (Academic Internship) at **MOG Technologies**
March 2022 - June 2022
Fully responsive web application consisting of an interactive map capable of showing different locations and metadata of a given movie. I developed both the frontend (React) and the backend (Strapi).
Besides the interactive map, it was assigned me the task of an admin dashboard development, to facilitate content ingestion by the project partners.
During this project the methodology used by the team was Agile.

Final Grade:
18/20

CERTIFICATES
